EVOTap

SWISS ENGINEERING 

**Guaranteed
pollutant-free
water for kitchen
and bathroom**

The EVOtap is based on a newly developed adsorption material that verifiably filters chemicals, chlorine, heavy metals, hormones and pesticides from your tap water. In addition, EVOtap improves the taste and neutralizes the smell of the water.

BENEFITS

- + Proven to filter a wide range of foreign and harmful substances from the water
- + Significant improvement in the taste of the water
- + Cost-effective in purchase and maintenance
- + Easy installation and filter change
- + Flow rate is not changed

Dimensions	H 305 mm x W 105 mm
Connections	Input and output 1/2 Inch; freely scalable
Installation	Drinking water installation according to DIN 1988
Filter	New adsorption material from our own development with an iodine value of 1800
Housing	Stainless steel, material no. 1.4401 and 1.4521 according DIN EN 10088, DIN EN 10312, DVGW worksheet GW 541. Made of 100% corrosion and erosion resistant materials according to ISO standard.
